</tr>
</tbody>
</table>

| Assessment: | Formative |
| To measure: | Knowledge and analytical skill |
| Outcome:    | CO1: Determine the basic concepts of programming with open source technology. CO2: Validate data and manage state of web pages. |
## Programme Outcome:

PO2: Ability to design, develop, test and maintain system, component, product or process as per needs and specification.

PO6: Ability to demonstrate the use of modern tools, models and languages to solve problems related to software development.

### Assessment Code: A2

### Weightage of Content:

<table>
<thead>
<tr>
<th>Unit</th>
<th>(%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>20%</td>
</tr>
<tr>
<td>2</td>
<td>30%</td>
</tr>
<tr>
<td>4</td>
<td>50%</td>
</tr>
</tbody>
</table>

### Assessment Type: Unit Test - 1

### Tentative Date: 16/01/2019

#### Kind of Question

<table>
<thead>
<tr>
<th>Format:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q-1 (A) Do as directed. (Attempt 4) [01 x 04 = 04]</td>
</tr>
<tr>
<td>(B) Answer in brief. (Attempt any 3 out of 4) [02 x 03 = 06]</td>
</tr>
</tbody>
</table>

Q-2 Answer the following questions.

(A) Analysis based question. [01 x 05 = 05]  
OR

(B) Analysis based question. [01 x 05 = 05]  
OR

(B) Analysis based question. [01 x 05 = 05]

Q-3 Answer the following in detail. (Attempt any 2 out of 3) [02 x 05 = 10]

### Assessment:

Formative

### To measure:

Knowledge and analytical skill

### Outcome:

CO1: Determine the basic concepts of programming with open source technology.

CO2: Validate data and manage state of web pages.

CO3: Create and use user-defined functions for data and file management.

### Programme Outcomes:

PO1: Proficiency in and ability to identify problems related to computer science as well as design and apply computational knowledge to solve them.

PO2: Ability to design, develop, test and maintain system, component, product or process as per needs and specification.

PO5: Knowledge of programming languages, database systems, operating systems, software engineering, Web & Mobile technology and relevant modern issues.

PO6: Ability to demonstrate the use of modern tools, models and languages to solve problems related to software development.

---

### Assessment Code: A2

### Weightage of Content:

<table>
<thead>
<tr>
<th>Unit</th>
<th>(%)</th>
</tr>

<td>40%</td>
</tr>
</tbody>
</table>

### Assessment Type: Unit Test - 2

### Tentative Date: 19/02/2019

#### Kind of Question

Q-1 (A) Do as directed. (Attempt 4) [01 x 04 = 04]
**Format:**
(B) Answer in brief. (Attempt any 3 out of 4) \[02 \times 03 = 06\]

Q-2 Answer the following questions.

(A) Analysis based question. \[01 \times 05 = 05\]

OR

(A) Analysis based question. \[01 \times 05 = 05\]

(B) Analysis based question. \[01 \times 05 = 05\]

OR

(B) Analysis based question. \[01 \times 05 = 05\]

Q-3 Answer the following in detail. (Attempt any 2 out of 3) \[02 \times 05 = 10\]

**Assessment:** Formative

**To measure:** Knowledge and analytical skill

| Outcome | CO1: Determine the basic concepts of programming with open source technology.  
CO2: Validate data and manage state of web pages.  
CO3: Create and use user-defined functions for data and file management.  
CO4: Implement object oriented concepts for web based programming. |
|-----------------|---------------------------------------------------------------------|
| Programme Outcomes: | PO1: Proficiency in and ability to identify problems related to computer science as well as design and apply computational knowledge to solve them.  
PO2: Ability to design, develop, test and maintain system, component, product or process as per needs and specification.  
PO5: Knowledge of programming languages, database systems, operating systems, software engineering, Web & Mobile technology and relevant modern issues.  
PO6: Ability to demonstrate the use of modern tools, models and languages to solve problems related to software development. |

**Assessment Code:** A3  
**Weightage of Content:** As per syllabus weightage  
**Assessment Type:** Internal Examination  
**Tentative Date:** 19/03/2019  
**Kind of Question Format:** As per external question paper format.

**Assessment:** Formative

**To measure:** Knowledge and analytical skill

| Outcome | CO1: Determine the basic concepts of programming with open source technology.  
CO2: Validate data and manage state of web pages.  
CO3: Create and use user-defined functions for data and file management.  
CO4: Implement object oriented concepts for web based programming. |
|-----------------|---------------------------------------------------------------------|
| Programme Outcomes: | PO1: Proficiency in and ability to identify problems related to computer science as well as design and apply computational knowledge to solve them.  
PO2: Ability to design, develop, test and maintain system, component, product or process as per needs and specification.  
PO5: Knowledge of programming languages, database systems, operating systems, software engineering, Web & Mobile technology and relevant modern issues.  
PO6: Ability to demonstrate the use of modern tools, models and languages to solve problems related to software development. |
Assessment Code : A4  Weightage of Content : As per syllabus

Assessment Type : Web Application Development  Tentative Submission Date : As per the following

Kind of Question Format:
The activity shall perform in a team. Each team shall develop and present web application.

Guidelines:
- The team shall consist of three or four members.
- A team has to identify their web application title and take approval of title from course teacher before the submission.
- Deadlines for submissions related to web application as per the following:
  - Submission of project title, team members and features of mini web application [Deadline: On or before 3-1-2019]
  - Submission, Presentation and Demonstration of web application [Deadline: On or before 15-3-2018]

- Late submission shall be penalized as 5% of full marks per day for maximum 3 days after submission date of particular parameter. If student fails to meet deadlines, he/she will receive zero marks for particular parameter.
- Evaluation will be based on following criteria:
  1. In time submission of project title, team members and features of web application (05 Marks)
  2. Demonstration (10 marks)
  3. Presentation Skill (05 Marks)
  4. Viva (05 Marks)

Assessment : Formative

To measure : Knowledge and analytical skill.

Outcome:
CO1: Determine the basic concepts of programming with open source technology.
CO2: Validate data and manage state of web pages.
CO3: Create and use user-defined functions for data and file management.
CO4: Implement object oriented concepts for web based programming.
CO5: Develop an application that interacts with database and XML files.

Programme Outcomes:
P01: Proficiency in and ability to identify problems related to computer science as well as design and apply computational knowledge to solve them.
P02: Ability to design, develop, test and maintain system, component, product or process as per needs and specification.
P04: Recognition of the need for and ability towards life-long learning.
P05: Knowledge of programming languages, database systems, operating systems, software engineering, Web & Mobile technology and relevant modern issues.
P06: Ability to demonstrate the use of modern tools, models and languages to solve problems related to software development.
P07: Ability to communicate and present knowledge effectively.

UFM policy

- If two or more submitted practical assignments are too similar for coincidence, a penalty shall be imposed that shall usually be the same for the student who did the original as for the one copying from it.

Any ascertained fact of breaking institute policy shall be associated with one or all of the following:

i. Zero marks for the work.
ii. Report to the Program Coordinator.
iii. Report to the Director.
