ABOUT UNIVERSITY
Top universities of India are the premier centres of higher education, known for their world class facilities and experienced faculty. 21st century has brought in the need for evolution of newer centres of learning owing to requirement of the new globalized world. The establishment of Uka Tarsadia University in 2011 by the Bardoli Pradesh Kelavani Mandal with the help of generous donation from B U Patel, USA is an effort towards meeting the growing demand for quality education. The University offers a comprehensive array of academic programs across the disciplines of Management, Technology, Science, Pharmacy, Commerce and others that lead students to self-enrichment and productive careers in their respective professions, government, business and industry.

ABOUT INSTITUTE
Began with MCA course in 2002, introduced MBA in 2004 providing excellent learning environment. The institute with best infrastructure with ergonomically designed auditorium, seminar hall and classrooms Well equipped with computing facility and modern teaching aids. State of the art computing facility with servers, computers and printers networked with Wi-Fi Technology of 100 Mbps, is being rigorously used by the students and faculty alike. SRIMCA MCA program is accredited by National Board of Accreditation (NBA). Recently, Silicon India conducted a survey for MCA colleges to understand the quality of students graduating from these colleges, on the basis of their performance & packages in the industry. SRIMCA stood at the 10th position in the list of top MCA colleges in Western zone.

PROGRAM OBJECTIVE
Knowledge and innovation played an important role in the development of society. The transformation from an agrarian society to the knowledge society has largely been brought about as a result of accumulation of knowledge through the centuries. Knowledge creation is, in fact, a process of value addition to previous knowledge through innovation. Knowledge management brings a new dimension, the need to manage tacit knowledge by focusing on people and enhance their capability by improving communication, information transfer and collaboration. The theme of Sustainable Quality is relevant to organizations and individuals working in any sector of the economy. Knowledge management has become a key process in understanding organizations and their use of resources and, ultimately, quality is a major differentiating factor when considering goods and services. Sustaining quality requires taking a strategic view that may present short to medium term challenges and knowledge management should be able to help address such challenges.
